

GLOBAL ALLOCATION ABSOLUTE RETURN

OVERVIEW

The Strategy seeks to generate positive total return, not relative return, by allocating dynamically across asset classes, free from the constraints of traditional benchmarks. The Strategy invests in a GMO-managed mutual fund, which in turn invests in actively managed equity, fixed income, alternative, and cash strategies, and a GMO-managed hedge fund-of-funds, which seeks positive total return with low volatility relative to equity markets and low correlation over a full market cycle to traditional market indices.
