

## U.S. TREASURY

## OVERVIEW

The GMO U.S. Treasury Fund seeks liquidity and safety of principal by investing in securities that are secured or backed by the full faith credit of the U.S. government, explicitly and implicitly. The Fund aims to take advantage of and dynamically allocate between opportunities in the market not accessible to the money market industry. GMO's Short Duration Strategies team looks for relative value opportunities in the U.S. while prioritizing capital preservation and liquidity standards in achieving its objective.

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein.** The portfolio is not managed relative to a benchmark. References to an index are for informational purposes only. The local market in which the Fund is priced was closed for Good Friday on March 29, 2024. Therefore, the performance for the fund and corresponding benchmark will utilize March 28 for purposes of the ending valuation for the March return and the starting valuation for the April return.

**Risks:** The Fund is not a money market fund and is not subject to the duration, quality, diversification and other requirements applicable to money market funds. Risks associated with investing in the Fund may include: (1) Market Risk – Fixed Income – The market price of a fixed income security can decline due to market-related factors, primarily rising interest rates. (2) Credit Risk – Securities issued by the U.S. Treasury historically have presented minimal credit risk. However, events in 2011 led to a downgrade in the long-term credit rating of U.S. bonds by several major rating agencies and introduced greater uncertainty about the repayment by the United States of its obligations. (3) Large Shareholder Risk – To the extent that a large number of shares of the Fund is held by a single shareholder (e.g., an institutional investor or another GMO Fund) or a group of shareholders with a common investment strategy (e.g., GMO asset allocation accounts), the Fund is subject to the risk that a redemption by those shareholders of all or a large portion of their Fund shares will require the Fund to sell securities at disadvantageous prices or otherwise disrupt the Fund's operations. For a more complete discussion of these risks and others, please consult the Fund's prospectus. Annualized Returns may include the impact of purchase premiums and redemption fees. Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit [www.gmo.com](http://www.gmo.com).
