QUARTERLY INVESTMENT REVIEW

PRODUCT OVERVIEW

The GMO Emerging Country Debt Fund's objective is total return in excess of that of its benchmark, the J.P. Morgan Emerging Markets Bond Index Global Diversified (EMBIG-D). The Fund invests primarily in external debt of sovereigns and quasi-sovereigns.

GMO's Emerging Country Debt team focuses on bottom-up issue selection, seeking to find issues with similar default characteristics but better long-term total return potential than the issues in EMBIG-D. We believe that our approach provides value-oriented clients with long-term investment objectives a significantly higher likelihood of outperforming the EMBIG-D than the approaches employed by other emerging debt managers who focus on economic forecasting, market timing, and other macro/top-down approaches.
