

EVENT-DRIVEN

OVERVIEW

The GMO Event-Driven Strategy seeks to generate absolute return by investing in opportunities that arise from significant corporate events where there is generally some uncertainty about the outcome of the event in question and where the outcome will be known relatively soon. In practice, the Fund's portfolio generally includes a heavy focus on merger arbitrage transactions, supplemented by other opportunities that exhibit similar risk, return, and time horizon characteristics. GMO's Event-Driven team approaches this opportunity set with a strong emphasis on expected value, assessing the likelihood and returns of each outcome and focusing on situations where the team's assessment of the expected value is greater than that implied by the market.

FACTS

Strategy Inception	31-Jul-16
Composite Inception	31-Jul-16
Total Assets	\$415mm USD
Index	FTSE 3-Mo. T-Bill

CUMULATIVE TOTAL RETURNS (USD, NET OF FEES, %)

Risks: Risks associated with investing in the Strategy may include: (1) Merger Arbitrage Risk: the proposed merger or acquisition might not be finalized. If the Strategy buys securities expecting an event-driven transaction (like a merger) and that transaction seems unlikely to happen, is delayed, or doesn't occur, the market price of those securities may drop significantly, leading to losses; (2) Special Situation Investment Risk: certain Funds may make investments in "special situations," which are often difficult to analyze. In any such investment opportunity, there exists the risk that the relevant transaction either will be unsuccessful, will take considerable time or will result in a distribution of cash or a new security the value of which will be less than the purchase price to the Fund of the security or other financial instrument in respect of which such distribution is received; and (3) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. For a more complete discussion of these and other risks, please consult the Fund's offering documents. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information.

Performance Returns: Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not predictive of future performance.** Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. **GMO LLC claims compliance with the Global Investment Performance Standards (GIPS®). A Global Investment Performance Standards (GIPS®) Composite Report is available on GMO.com by clicking the GIPS® Composite Report link in the documents section of the strategy page. GIPS® is a registered trademark owned by CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Actual fees are disclosed in Part 2 of GMO's Form ADV and are also available in each strategy's Composite Report.** Returns include a substantial, one-time litigation settlement recovery received on December 16, 2024. This event contributed 2.64% to 2024 annual performance, based on a representative account. Performance for other periods, including this date, was also positively impacted, sometimes materially. Without this recovery, performance would have been lower in both absolute terms and relative to the benchmark. Additional information is available upon request. The portfolio is actively-managed, is not managed relative to a benchmark and uses the Index for performance comparison purposes only and, where applicable, to compute a performance fee.

EVENT-DRIVEN

IMPORTANT INFORMATION

Index(es): The FTSE 3-Month Treasury Bill Index is an independently maintained and widely published index comprised of short-term U.S. Treasury bills.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

GLOSSARY

Risk Statistics: Risk profile data is net of fees. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio. Drawdown is based on the portfolio's worst performance over the period based on monthly observations.

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. We are privately owned, which allows us to singularly focus on our sole business – achieving outstanding long-term client investment outcomes. Offering multi-asset, equity, fixed income, and alternative strategies, we invest with a long-term, valuation-based philosophical approach.
