

GLOBAL ALL COUNTRY EQUITY ALLOCATION

OVERVIEW

The Strategy seeks to generate total return greater than that of the MSCI All Country World Index.

The philosophy that underlies all of GMO's Asset Allocation investment strategies is the belief that, at times and in the short term, the pricing of asset classes can deviate from true intrinsic value, but mean reverts to appropriate valuation levels over the long term. Using GMO's 7-Year Asset Class Forecasts, the Strategy seeks to allocate to areas of the global equity markets we believe are most attractively valued. Our approach combines the best of GMO's top-down Asset Allocation views and bottom-up equity research to identify mispricings at both the asset class and individual security levels. The Strategy allocates to equity strategies that are actively managed by other GMO investment teams with expertise and experience in security selection within their respective markets.

FACTS

Strategy Inception	31-Dec-93
Composite Inception	31-Dec-93
Total Assets	\$1.2bn USD
Benchmark	MSCI ACWI ++
Alternate Benchmark	MSCI ACWI

Risks: Risks associated with investing in the Strategy may include: (1) Market Risk - Equities: The market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. (2) Management and Operational Risk: The risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility. (3) Non-U.S. Investment Risk: The market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. For a more complete discussion of these risks and others, please consult the Fund's offering documents. This is not a complete list of risks associated with investing in the Strategy. Please contact GMO for more information. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not predictive of future performance.** Net returns are presented after the deduction of a model advisory fee and incentive fee if applicable. These returns include transaction costs, commissions and withholding taxes on foreign income and capital gains and include the reinvestment of dividends and other income, as applicable. Fees paid by accounts within the composite may be higher or lower than the model fees used. **GMO LLC claims compliance with the Global Investment Performance Standards (GIPS®). A Global Investment Performance Standards (GIPS®) Composite Report is available on GMO.com by clicking the GIPS® Composite Report link in the documents section of the strategy page. GIPS® is a registered trademark owned by CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Actual fees are disclosed in Part 2 of GMO's Form ADV and are also available in each strategy's Composite Report.** Returns include a substantial, one-time litigation settlement recovery received on December 16, 2024. This event contributed 1.12% to Q4 2024 and 1.28% to 2024 annual performance, based on a representative account. Performance for other periods, including this date, was also positively impacted, sometimes materially. Without this recovery, performance would have been lower in both absolute terms and relative to the benchmark. Additional information is available upon request.

GLOBAL ALL COUNTRY EQUITY ALLOCATION

IMPORTANT INFORMATION

Benchmark(s): The MSCI ACWI ++ Index is an internally maintained benchmark computed by GMO, comprised of (i) GMO blended benchmark of Global All Country Equity Allocation Composite through 06/30/2014 and (ii) MSCI ACWI (All Country World) Index (MSCI Standard Index Series, net of withholding tax) thereafter. The GMO blended benchmark of Global All Country Equity Allocation Composite is comprised of a weighted average of account benchmarks; many of the account benchmarks consist of MSCI ACWI (All Country World Index) (MSCI Standard Index Series, net of withholding tax) or some like proxy for each market exposure they have. For each underlying account benchmark, the weighting of each market index will vary slightly. The index is internally blended by GMO and maintained on a monthly basis. The MSCI ACWI (All Country World) Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of global developed and emerging markets. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder. The MSCI ACWI (All Country World) Index (MSCI Standard Index Series, net of withholding tax) is an independently maintained and widely published index comprised of global developed and emerging markets. MSCI data may not be reproduced or used for any other purpose. MSCI provides no warranties, has not prepared or approved this report, and has no liability hereunder. Please visit <https://www.gmo.com/americas/benchmark-disclaimers/> to review the complete benchmark disclaimer notice.

The above information is based on a representative account in the Strategy selected because it has the fewest restrictions and best represents the implementation of the Strategy.

GLOSSARY

Portfolio Allocations: Weightings are as of the date indicated and are subject to change. The groups indicated above represent exposures determined pursuant to proprietary methodologies and are subject to change over time. Totals may vary due to rounding. Group weights under 1% are not reflected. **Risk Statistics:** Risk profile data is net of fees. Alpha is a measure of risk-adjusted return. Beta is a measure of a portfolio's sensitivity to the market. R-Squared is a measure of how well a portfolio tracks the market. Sharpe Ratio is the return over the risk free rate per unit of risk. Std Deviation is a measure of the volatility of a portfolio.

Sector Exposures: The Global Industry Classification Standard (GICS) is the exclusive intellectual property of MSCI Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P). Neither MSCI, S&P, nor any third party makes any representations or warranties, express or implied, with respect to GICS or the results to be obtained by the use thereof, and expressly disclaim all warranties, including of merchantability and fitness for a particular purpose. Neither MSCI, S&P, nor any third party shall have any liability for any damages of any kind relating to the use of GICS.

Top Holdings: Portfolio holdings are percent of equity. Where applicable, the top holdings are derived by looking through to the underlying portfolios in which the asset allocation strategy invests and, where appropriate, individual security positions are aggregated. They are subject to change and should not be considered a recommendation to buy individual securities. This portfolio continues to hold de minimis Russian exposure as a result of past positioning and ongoing illiquidity. GMO has suspended net new purchases of Russian securities firm-wide.

ABOUT GMO

Founded in 1977, GMO is a global asset manager committed to delivering superior performance and advice to our clients. We are privately owned, which allows us to singularly focus on our sole business – achieving outstanding long-term client investment outcomes. Offering multi-asset, equity, fixed income, and alternative strategies, we invest with a long-term, valuation-based philosophical approach.
