Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. Gross of fees, expenses and transaction costs, if any. If these fees, expenses and costs were included, performance would be lower. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com.** Returns include a substantial, one-time litigation settlement recovery received on December 16, 2024. This event contributed 1.12% to Q4 2024 and 1.28% to 2024 annual performance. Performance for other periods, including this date, was also positively impacted, sometimes materially. Without this recovery, performance would have been lower in both absolute terms and relative to the benchmark. Additional information is available upon request.

MAJOR PERFORMANCE DRIVERS

- Top-down asset allocation detracted significantly from relative performance for the quarter as, within Developed Markets, the portfolio is biased away from the U.S. market, which strongly outperformed. It was also a relatively poor quarter for Emerging Markets.
- Security selection was also negative, as a combination of Quality and Value had a challenging time in the U.S.

Emerging Market equities, with an emphasis on undervalued stocks within attractively valued countries/sectors, represented 13.3% of the total portfolio weight on average during the quarter. Our overweight position in Emerging Market equities detracted from relative performance as the MSCI Emerging Market index returned -8.0%, well behind the MSCI ACWI return of -1.0%. Security selection was solid, as the portfolio outperformed with a return of -7.1%. An overweight position in YPF (Argentina Energy) featured in the top five biggest individual contributors to relative performance at the total portfolio level, while no Emerging Market names featured in the top five biggest individual detractors.

U.S. equities accounted for 40.4% of the total portfolio on average through the quarter, comprising 3.1% in U.S. Small Cap Value equity, 5.1% in U.S. Small Cap Quality equity, 5.9% in broad U.S. equity, 13.3% in U.S. Opportunistic Value equity, and the remainder in the Quality, Quality Cyclical, and Resources strategies. This leaves the portfolio 25.5% underweight U.S. equities in total, and this had a negative impact on relative performance for the quarter as the MSCI USA index returned 2.7%, outpacing MSCI ACWI. Security selection in the U.S. was difficult as, in aggregate, our U.S. portfolio returned -1.7%. Underweight positions in Tesla (Consumer Discretionary), NVIDIA (Information Technology), Broadcom (Information Technology), Amazon (Consumer Discretionary), and Apple (Information Technology) made up the top five biggest individual detractors from relative performance for the quarter. On the flipside, overweight positions in Eli Lilly (Health Care) and Advanced Micro Devices (Information Technology) featured in the top five biggest individual contributors to relative performance at the total portfolio level.

Inception Date: 26-Nov-96

Performance for the year of inception is less than a full calendar year. Returns shown for periods greater than one year are on an annualized basis.

Risks: Risks associated with investing in the Fund may include: (1) Market Risk - Equities: The market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. (2) Management and Operational Risk: The risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility. (3) Non-U.S. Investment Risk: The market prices of many non-U.S. securities (particularly of companies tied economically to emerging countries) fluctuate more than those of U.S. securities. Many non-U.S. markets (particularly emerging markets) are less stable, smaller, less liquid, and less regulated than U.S. markets, and the cost of trading in those markets often is higher than it is in U.S. markets. For a more complete discussion of these risks and others, please consult the Fund's Prospectus. **Performance Returns:** Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.

Net Expense Ratio: 0.57%; Gross Expense Ratio: 0.60% Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2025. Elimination of this reimbursement will result in higher fees and lower performance. Gross Expense Ratio is equal to the Funds Total Annual Operating Expenses set forth in the Funds most recent prospectus dated June 30, 2024.

QUARTERLY INVESTMENT REVIEW

MAJOR PERFORMANCE DRIVERS CONT.

Developed ex-U.S. equities accounted for an average weight of 45.1% of the portfolio for the quarter, including the dedicated Japan Value position and some exposure from the Quality, Resources, and Quality Cyclical strategies. This overweight position in Developed ex-U.S. had a negative impact on relative performance as the MSCI World ex-U.S. index returned -7.4%, lagging MSCI ACWI. Security selection within Developed Markets was flat for the quarter and the portfolio also returned -7.4 in aggregate. An underweight position in Novo Nordisk (Denmark Health Care) and an overweight position in Panasonic Holdings (Japan Consumer Discretionary) featured in the top five biggest individual contributors, while no Developed ex-U.S. names featured in the top five biggest individual detractors from relative performance for the quarter.

Portfolio weights, as a percent of equity, for the positions mentioned were: YPF (0.1%), Advanced Micro Devices (0.0%), Broadcom (0.0%), Tesla (0.0%), Apple (1.0%), Panasonic Holdings (0.4%), NVIDIA (0.3%), Eli Lilly (0.2%), Amazon (0.5%), and Novo Nordisk (0.0%).

QUARTERLY INVESTMENT REVIEW

PRODUCT OVERVIEW

The GMO Global Equity Allocation Fund seeks to generate total return greater than that of the MSCI All Country World Index.

The philosophy that underlies all of GMO's Asset Allocation investment strategies is the belief that, at times and in the short term, the pricing of asset classes can deviate from true intrinsic value but mean reverts to appropriate valuation levels over a complete market cycle. Using GMO's 7-Year Asset Class Forecasts, the Fund seeks to allocate to areas of the global equity markets we believe are most attractively valued. Our approach combines the best of GMO's top-down Asset Allocation views and bottom-up equity research to identify mispricings at both the asset class and individual security levels. The Fund allocates to equity strategies that are actively managed by other GMO investment teams with expertise and experience in security selection within their respective markets.

IMPORTANT INFORMATION
