What is this product?

Type GMO Investments ICAV (the "ICAV") is an open-ended investment company with variable capital and is an umbrella fund with segregated liability between sub-funds.

Investment objective and policy

The investment objective of GMO Climate Change Select Investment Fund (the "Fund") is to seek high total return. The Fund invests primarily in securities of companies the Investment Adviser believes are positioned to directly or indirectly contribute to efforts to curb or mitigate the long-term effects of global climate change, to address the environmental challenges presented by global climate change, or to improve the efficiency of resource consumption. Such companies include companies involved in industries relating to clean energy, batteries and storage, electric grid, energy efficiency, recycling and pollution control, agriculture, water, and businesses that service such industries. The Fund may also invest in other investment funds to pursue the investment objective of this Fund. The Fund selects securities based on its evaluation of companies' published financial information and corporate behaviour, sustainability and other ESG criteria, securities' prices, commodities' prices, equity and bond markets, the overall global economy, and governmental policies. The factors considered and models used by the investment adviser may change over time. The Fund may invest in debt securities which may include investment grade, non-investment grade and unrated debt securities of any credit quality and having any maturity or duration. Such debt securities may be supranational, government or corporate securities and may be fixed or floating securities. The proportion of investments of the Fund used to meet environmental characteristics will be at least 80 per cent. The Fund's investments will exclude: (i) companies it believes to have the highest levels of potential carbon emissions content; (ii) companies involved in activities related to controversial weapons; (iii) tobacco companies; and (iv) companies that determined to be in violation of core international norms and conventions. The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). Derivatives may be used for investment purposes and for the reduction of risk and cost and the generation of additional capital or income. The Fund is actively managed and does not manage the Fund to, or control the Fund's risk relative to, any securities index or securities benchmark. The Fund uses the MSCI AC World Index for performance comparison purposes only (the "Comparator Index"). Although the Fund's securities may be components of the Comparator Index, the Fund's investment manager may or may not invest in securities not included in the Comparator Index. You may sell your shares usually on each business day (generally, a day on which banks in Dublin and London and New York and the New York Stock Exchange are open) by sending your request to State Street Fund Services (Ireland) Limited before 2.00 pm (Irish time) on the preceding business day. Income is reinvested into the Fund. For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at www.gmo.com. Fund documents including the prospectus, supplement and the latest annual and half-yearly reports are available free of charge in English. These can be found, along with other information, such as share prices and other classes of the Fund that are available, on the Fund's website at www.gmo.com. This document describes a sub-fund of the Fund. The prospectus and periodic reports are prepared in respect of the entire Fund. The assets and liabilities of each sub-fund of the Fund are segregated by law, and so the assets of one sub-fund cannot be used to discharge the liabilities of another sub-fund. Each investor of the Fund may apply to exchange shares in the Fund for shares in another sub-fund of the Fund as set out in the prospectus.

Intended retail investor

Investors seeking capital growth over a medium to long-term period with a moderate level of volatility.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For other risks materially relevant to the fund which are not taken into account in the summary risk indicator, please read the prospectus available at www.gmo.com.

Performance

The figures shown include all the costs of the fund itself, where applicable, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: 5 years Example investment USD 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	You could lose some or all of your investment.		
Stress	<i>What you might get back after costs</i>	USD 2,780	USD 2,180
	Average return each year	-72.19%	-26.25%
Unfavourable	<i>What you might get back after costs</i>	USD 7,190	USD 5,470
	Average return each year	-28.11%	-11.37%
Moderate	<i>What you might get back after costs</i>	USD 10,350	USD 13,580
	Average return each year	3.53%	6.32%
Favourable	<i>What you might get back after costs</i>	USD 15,310	USD 18,910
	Average return each year	53.08%	13.59%

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of fund over the last 10 years. The fund performance includes performance of Class D USD from fund inception and prior to that MSCI All Country World Index ("ACWI"). Markets could develop very differently in the future and the future performance of the fund may be materially different from that of MSCI ACWI.

Unfavourable scenario This type of scenario occurred for an investment between 2021/12 and 2025/02

Moderate scenario This type of scenario occurred for an investment between 2015/07 and 2020/07

Favourable scenario This type of scenario occurred for an investment between 2016/10 and 2021/10

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Waystone Management Company (IE) Limited is unable to pay you?

You will not face financial loss should Waystone Management Company (IE) default on its obligation. In the event of insolvency of the depositary, State Street Custodian Services (Ireland) Limited, the Fund's assets are protected and are not subject to a claim by the depositary's liquidator. In the event that there is any loss, there is no compensation or guarantee scheme in place which may offset, all or any of, any such loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

Recommended holding period: 5 years Example investment USD 10,000		
	If you exit after 1 year	If you exit after 5 years
Total costs	USD 99	USD 688
Annual cost impact(*)	0.99%	1.06%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.37% before costs and 6.32% after costs.

Composition of costs
