

RESOURCES UCITS USD CLASS A

OVERVIEW

The GMO Resources UCITS Fund seeks to generate total return by investing in equities in the natural resources sector.

GMO's Focused Equity team believes that the increasing demand for natural resources, driven primarily by population growth in and industrialization of emerging markets, coupled with the limited supply of these resources, favors an upward trend in resource prices over time. The Fund seeks to invest in the securities of companies that we believe will benefit from this expected long-term rise in natural resource prices.

This is a marketing communication. This is not a contractually binding document. Please refer to the prospectus and to the KIID/PRIIPS KID and do not base any final investment decision on this communication alone. **Risks:** Risks associated with investing in the Fund may include: (1) Focused Investment Risk: The Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund's performance more than if the Fund invested in the securities of a larger number of issuers. (2) Commodities Risk: Commodity prices can be extremely volatile, and exposure to commodities can cause the value of the Fund's shares to decline or fluctuate more than if the Fund had a broader range of investments. (3) Market Risk - Equities: The market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares. For a more complete discussion of these risks and others, please consult the Fund's Prospectus. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. To obtain performance information to the most recent month-end, visit www.gmo.com. **Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein.** Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower. The portfolio is not managed relative to a benchmark. References to an index are for informational purposes only.
