

SGM MAJOR MARKETS INVESTMENT EUR CLASS A

OVERVIEW

The GMO SGM Major Markets Investment Fund's investment objective is long-term total return. The Fund takes both long and short positions in a range of global equity, bond, currency, commodity markets, and over-the-counter (OTC) markets using exchange-traded OTC futures and forward foreign exchange contracts, as well as by making other investments.

The Systematic Global Macro team's investment process systematically applies value and sentiment strategies across global markets. We believe that markets are inefficient but, in the long term, that economic reality will prevail and markets will revert toward fair value; however, the timing of this is uncertain. We aim to profit from mean reversion by buying markets that we believe are depressed in price and shorting markets that we believe are trading at inflated values. To deal with the uncertainty of timing, we model investor sentiment.
