What is this product?

Type GMO Investments ICAV (the "ICAV") is an open-ended investment company with variable capital and is an umbrella fund with segregated liability between sub-funds.

Investment objective and policy

The investment objective of GMO SGM Major Markets Investment Fund (the "Fund") is to seek long-term total return. The Fund seeks annualised (average annual) excess returns of 5% (gross of fees) above its benchmark, the FTSE 3 Month Tbill Index, and annualised volatility (a variation from the average price) of approximately 6-10%, each over a complete market cycle. The above are targets and not forecasts and there can be no guarantee or assurance that the Fund will achieve a return which meets or exceeds any change in the benchmark or that the Fund will be subject to the levels of volatility referred to. The Fund does not seek to track its benchmark and so has discretion as to the investments it may make. The Fund may invest in a wide range of assets, including long and short positions in equities (shares) and related securities, debt securities, money market instruments, currencies, interest rates, instruments relating to commodities indices and related derivatives. A long position will increase in value if the price of the underlying asset goes up; a short position will increase in value if the price of the underlying asset goes down; and vice versa. Such assets may be located, listed or traded anywhere in the world, may have any market capitalisation and may belong to any industry sector. The investment adviser uses investment models for global tactical asset allocation and equity, bond, currency, and commodity market selection. The investment adviser will re-allocate among asset classes on an opportunistic basis. The factors considered and models used by the investment adviser may change over time. The Fund may invest in debt securities which may include investment grade, non-investment grade and unrated debt securities of any credit quality. Such debt securities may be supranational, government or corporate securities and may be fixed, floating or auction rate securities. The Fund may use instruments whose value is determined by changes in the value of the underlying assets they represent (derivatives). Derivatives may be used extensively for investment purposes and for the reduction of risk and cost and the generation of additional capital or income. The Fund is actively managed. The Fund does not seek to track its benchmark and so has discretion as to the investments it may make. The Fund uses the S&P 500 for performance comparison purposes only (the "Comparator Index"). Although the Fund's securities may be components of the Comparator Index, the Fund's investment manager may or may not invest in securities not included in the Comparator Index. You may sell your shares usually on each business day (generally a day on which banks in Dublin and London and the New York Stock Exchange are open) by sending your request to State Street Fund Services (Ireland) Limited before 2.00 pm (Irish time) on the preceding business day. Income is reinvested into the Fund. For more information about the investment policy, see "Investment Objectives and Policies of the Funds" in the Fund's prospectus available at www.gmo.com. Fund documents including the prospectus, supplement and the latest annual and half-yearly reports are available free of charge in English. These can be found, along with other information, such as share prices and other classes of the Fund that are available, on the Fund's website at www.gmo.com. This document describes a sub-fund of the Fund. The prospectus and periodic reports are prepared in respect of the entire Fund. The assets and liabilities of each sub-fund of the Fund are segregated by law, and so the assets of one sub-fund cannot be used to discharge the liabilities of another sub-fund. Each investor of the Fund may apply to exchange shares in the Fund for shares in another sub-fund of the Fund as set out in the prospectus.

Intended retail investor

Investors seeking capital growth over a medium to long-term period with a moderate level of volatility.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If we are not able to pay you what is owed, you could lose your entire investment.

For other risks materially relevant to the fund which are not taken into account in the summary risk indicator, please read the prospectus available at www.gmo.com.

Performance

The figures shown include all the costs of the fund itself, where applicable, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

Recommended holding period: 5 years Example investment EUR 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	You could lose some or all of your investment.		
Stress	<i>What you might get back after costs</i>	EUR 7,560	EUR 7,300
	Average return each year	-24.39%	-6.11%
Unfavourable	<i>What you might get back after costs</i>	EUR 9,350	EUR 8,960
	Average return each year	-6.52%	-2.17%
Moderate	<i>What you might get back after costs</i>	EUR 9,960	EUR 9,660
	Average return each year	-0.35%	-0.70%
Favourable	<i>What you might get back after costs</i>	EUR 10,630	EUR 10,220
	Average return each year	6.25%	0.44%

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of fund over the last 10 years. The fund performance includes performance of Class A EUR and prior to that performance of GMO SGM Major Markets Fund, a US mutual fund managed by GMO that implements the same strategy and is within the same GIPS composite as the fund. Markets could develop very differently in the future and the future performance of the fund may be materially different from that of GMO SGM Major Markets Fund.

Unfavourable scenario This type of scenario occurred for an investment between 2017/10 and 2022/10

Moderate scenario This type of scenario occurred for an investment between 2019/04 and 2024/04

Favourable scenario This type of scenario occurred for an investment between 2015/12 and 2020/12

The stress scenario shows what you might get back in extreme market circumstances.

What happens if Waystone Management Company (IE) Limited is unable to pay you?

You will not face financial loss should Waystone Management Company (IE) default on its obligation. In the event of insolvency of the depositary, State Street Custodian Services (Ireland) Limited, the Fund's assets are protected and are not subject to a claim by the depositary's liquidator. In the event that there is any loss, there is no compensation or guarantee scheme in place which may offset, all or any of, any such loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return)
- For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested

Recommended holding period: 5 years Example investment EUR 10,000		
	If you exit after 1 year	If you exit after 5 years
Total costs	EUR 178	EUR 920
Annual cost impact(*)	1.78%	1.78%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 1.08% before costs and -0.70% after costs.

Composition of costs
