OVERVIEW

The GMO Quality Fund seeks to generate total return by investing primarily in equities the Focused Equity team believes to be of high quality.

The team believes that companies with established track records of historical profitability and strong fundamentals – high quality companies – are able to outgrow the average company over time and are therefore worth a premium price. The Fund's disciplined approach uses both quantitative and fundamental techniques to assess the relative quality and valuation of global companies and aims to exploit a long-term investment horizon while withstanding short-term volatility.

ANNUAL EXPENSES (%)

Net Expense Ratio	0.50
Gross Expense Ratio	0.51

Net Expense Ratio reflects the reduction of expenses from fee reimbursements. The fee reimbursements will continue until at least June 30, 2025. Elimination of this reimbursement will result in higher fees and lower performance.

Gross Expense Ratio is equal to the Funds Total Annual Operating Expenses set forth in the Funds most recent prospectus dated June 30, 2024.

Net of all fees and expenses after reimbursement by the Manager, but not transaction costs, if any. If certain expenses were not reimbursed, performance would be lower.

Performance data quoted represents past performance and is not indicative of future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance data may be lower or higher than the performance data provided herein. To obtain performance information to the most recent month-end, visit www.gmo.com. The portfolio is actively-managed, is not managed relative to a benchmark and uses the Index for performance comparison purposes only and, where applicable, to compute a performance fee.

Risks: Risks associated with investing in the Fund may include: (1) Market Risk - Equities: the market price of equities may decline due to factors affecting the issuer, its industries, or the economy and equity markets generally. Declines in stock market prices generally are likely to reduce the net asset value of the Fund's shares; (2) Management and Operational Risk: the risk that GMO's investment techniques will fail to produce desired results, including annualized returns and annualized volatility; and (3) Focused Investment Risk: the Fund invests its assets in the securities of a limited number of issuers, and a decline in the market price of a particular security held by the Fund may affect the Fund's performance more than if the Fund invested in the securities of a larger number of issuers. For a more complete discussion of these and other risks, please consult the Fund's Prospectus. **Performance Returns:** Returns shown for periods greater than one year are on an annualized basis. Annualized Returns may include the impact of purchase premiums and redemption fees. The GMO Trust funds are distributed in the United States by Funds Distributor LLC. GMO and Funds Distributor LLC are not affiliated.
