

GLOBAL ASSET ALLOCATION

OVERVIEW

The Strategy seeks to achieve a total return greater than that of its benchmark of 65% MSCI All Country World Index and 35% Bloomberg U.S. Aggregate Index, over a complete market cycle, by allocating dynamically across asset classes.

The philosophy that underlies all of GMO's Asset Allocation investment strategies is the belief that, at times and in the short term, the pricing of asset classes can deviate from true intrinsic value, but mean reverts to appropriate valuation levels over the long term. GMO's proprietary 7-Year Asset Class Forecasts form the foundation of our investment process, providing a framework to assess the return opportunity embedded in different asset classes.
